Expanding Your Horizons 2023

Travel to Bangladesh

CH 540 Environmental Pollution and Health (I, M, UU, WC)
Prerequisite: General Chemistry/or Instructor permission, open to Science and non-Science majors
Travel dates: March 18-24, 2023

Would you like to travel and study global environmental issues, health care in developing nations at the same time? Then you may consider taking this EYH course in Spring 2023.

Although 70% of the earth’s surface is covered with water, less than 1% of it is drinking water. Shortage of potable water, pollutants in the air and water and their effects on public health are shaping up as major global environmental issues in the 21st century. This course will address water and air pollution in third world countries with special focus on Bangladesh, where the arsenic contamination in groundwater has become a serious public health concern since 1993. In addition, the course will cover topics of household energy, indoor air pollution in rural houses and its impact on child and mother health in developing nations. Deadline for application is December 15, 2022. Cost of Travel: Approx. $3,100.
